

# Browns Bay School

EFFORT BRINGS REWARD

**March 2021**

## **PROPERTY DEVELOPMENT UPDATE**

We were delighted to learn that Woodview Construction have been appointed the building contractor for our 12 classroom block build. They will be on site from March 1.

The construction services company has been involved in renovation and new builds within the education sector.

Takapuna Grammar School's main block is one renovation they have just completed to a high level of workmanship. They currently have two other jobs on the North Shore, Torbay Primary School and Birkenhead Primary School. Being a North Shore company who have close connections to the school and area, they are enjoying a good run of 'local' work. We look forward to working with Woodview Construction.

Over the holiday break we had a busy time on the school site in preparation for the New Build. Rooms 18 and 19 were transported onto the field for use later in the year as our school roll grows, while Rooms 20 and 21 were demolished. Our Year 6 students moved into their "Portacom's" for the year and they seem very happy in their new `village`.

The plans for the New Build have been on display in the school office since late last year. There are QR Codes on the plans that will, when viewed through a smart phone, allow you to see a 360° panorama of the interior of the Build.

As well as a new classroom block we will have a finished product including extensive landscaping of:

- A new driveway to the Hall
- A huge water tank for water recycling and school irrigation
- New outdoor learning areas
- Shared gardening opportunities
